A: As others have said, you need to download the latest version of your Autodesk product. I highly recommend going to the product's documentation page for your product and following the directions there. Most of the time, you should be able to download the latest version and install it using the installer provided by Autodesk. DNA matching of a long-unsolved cold case Posted by jbdunlop on June 05, 2012 The investigators at the Department of Justice who sent me and my colleagues a batch of the newly-released genetic test results from the case of the cold case that gave us our biggest case with cold tests over the last couple of years (see here and here) revealed the next big step in this case: DNA matching. The man whose DNA was found on the common unknown piece of cloth that was used to strangle and rob several men in 1972 in New York City, has, after years of seeking, now been identified. The victim who went unnamed for decades was Robert Hays, 57. Hays died of cancer in 1985. The semen-stained white T-shirt was found in a bag after the victims had been tied up with rope and sodomized with a stick, according to the NYPD. Hays' wallet was found at the scene. The bags containing the clothing were later sent from the NYPD to the Office of the Chief Medical Examiner (OCME) and then finally to the Federal Bureau of Investigation (FBI) for analysis. About the DNA DNA analysis of the T-shirt used to kidnap and sexually assault the men, showed the DNA belonged to Robert Hays. At the time, there was no match on any national database and the infamous cold test result was archived in a vault. In addition, a DNA sample of Hays' wife, Linda, wasn't available for testing because she had been cremated years earlier. After this case, we were able to submit DNA profiles to the Combined DNA Index System (CODIS) for the first time, and that is where we found the big breakthrough. A woman with Hays' DNA was a convicted felon -- and she had no match in the CODIS system. For more than 25 years, Hays' family has been looking for answers, posting a string of 'missing' flyers around the neighborhood. A relative recently wrote a book, Robert Hays, Murder and Mystery.
